Subject: O&H Isotopes Results
Attachments: Red Hill O-H Isotopes_Sept-2021.xlsx

Hi Jack,

Got the results of the O&H isotope analysis back yesterday and here are the Red Hill results. Added the Halawa Shaft analysis to the Red Hill results since that is the source of your drill water and would a good metric for reviewing the data. Also, included the lab report since that has the QA data.

This data set marks the end of a multi-year data collection effort. Now trying to figure out what it really means begins. Thanks for collecting these for us.

Bob W.
